

Minutes for October 1st, 2007  
Linux User Group of VCU

Today's meeting topic was GIMP

--GIMPShop is a version of GIMP with photoshop interface. This is mainly designed to run under the MAC OS X interface. Windows versions are available.

<http://gimpshopdotnet.blogspot.com/> .

Demo Day is Tuesday, October 16th. It will be from 9AM to ?, on the first floor of the engineering building

We will be posting flyers for the demo day around campus this week. Possible locations include the A-frame holders located outside the student commons, as well as around the various buildings.

We will also try to get the event listed on the VCU Telegram

Anyone interested in burning CD ISOs for the demo day please contact Nathaniel
